Inverse Fibonacci

Let's have a try!

Given the value of $\text{Fib}(n)$

Can you write a program to
find the value of n ?

The 1st..5th Fibonacci numbers are:

1, 1, 2, 3, and 5

Submission: <http://bit.do/acm0210>

$$\text{Fib}(1) = 1$$

$$\text{Fib}(2) = 1$$

$$\text{Fib}(3) = 2$$

...

$$\text{Fib}(n) = 1 \dots$$

$n = ?$ (hint: $(n)_{16}$ has some meaning)

Eight Queens

- Place eight queens on an 8x8 chessboard
- No queen can attack another
- Your job is to verify a solution to the puzzle
